This catalog was developed through vetted sources of local manufacturers and suppliers. The intended purpose of this catalog is to provide all available and vetted suppliers of critical items needed during the COVID-19 pandemic. As price and quantity may change daily, the SFMA cannot guarantee a certain price or quantity available at the time of inquiry. Further, the SFMA is not endorsing a particular supplier and readers of this catalog are encouraged to reach out to whom they feel is best suited to accommodate any needs.

## FACE SHIELDS

### **ACRYLICO - Protecting First Responders and Medical Professionals.**

AcryliCo has shifted some production capacity to manufacture Personal Protective Equipment for first responders and medical professionals.

Face Shields Clear personal protective equipment (PPE) devices for protection of the facial area and associated mucous membranes (eyes, nose, mouth) from splashes, sprays, and spatter of body fluids. Contact: Cleveland Passmore, (561) 304-2921, sales@acrylico.com

### **PROTECTIVE ANTI-FOG CLEAR FACE SHIELD**

Contact: Craig@PrintBasics.com • 954-868-4155

### **SOP TECHNOLOGIES FACE SHEILDS**

- 100% made from FDA approved Lexan polycarbonate material.
- Reusable and easy to clean.
- Made from one continuous piece of domestically produced LEXAN polycarbonate shield.
- Foam padding on forehead.
- Covers the front and sides of the face, is full face length with outer edges of the face shield reaching beyond the point of the ear, including chin and forehead protection, and covers the forehead.
- 0.030-0.040 inches thick to ensure durability and flexibility.
- One-size-fits-all with 20 slots for adjustments

Contact: Emilio Lopez, CEO • 305-792-8778 • Emilio@soptechint.com

### **VISTA DISPOSABLE FACE SHIELD**

We developed, designed and are currently manufacturing the Vista Disposable Face Shield which is already being used in hospitals by healthcare professionals and can also be used in many other business sectors (i.e corrections, food processing, dentists etc). Our lightweight, adjustable and disposable design is ideal for a "onetime use" environment. It is easy to assemble, comfortable to wear and the curved long shape offers coverage to the face and neck areas.

Contact: Juan Roque • (305) 635-2000, email: jroque@vistacolor.com

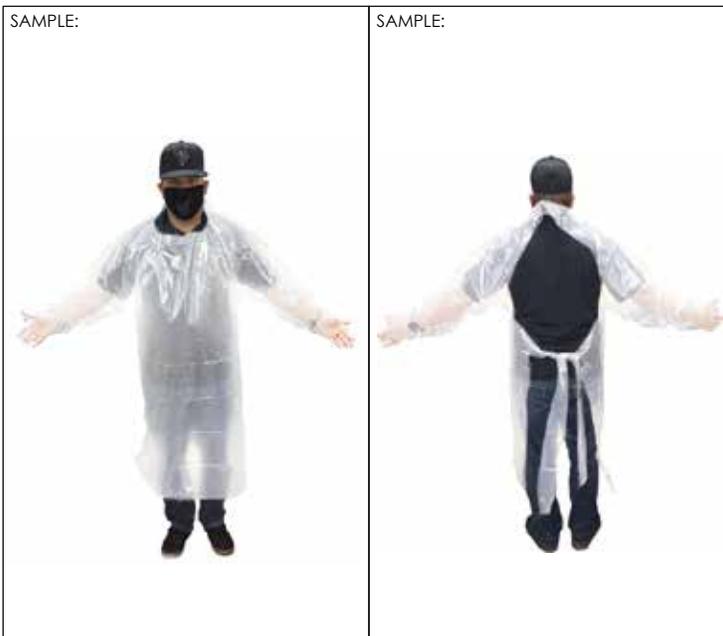

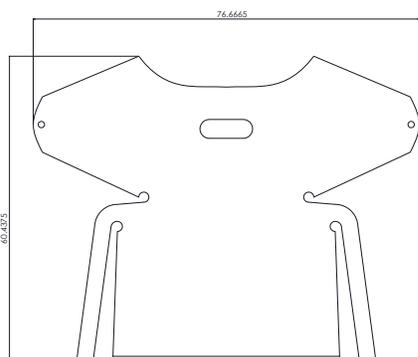

# PROTECTIVE GEAR

## TECHNICAL MATERIAL INFO:

The disposable gown is made of 1.5, 2 or 4 mil polyethylene (1.5 mil standard)

- Polyethylene
- Waterproof
- UV resistance - 300 hours
- Mildew resistant
- Temperature limits -13 to 226°F
- Recyclable Code 5

The product measurements are 70.7 inches tall by 50.4 inches wide.

## TUUCI FACE MASKS

Tuuci's face masks are manufactured in Miami, and constructed of BellBloc 68. BellBloc is a hydrophobic PET fabric liner system that improves the performance of every fabric in any application by protecting the foam insert from the elements. It was developed specifically for outdoor, hospitality and residential markets to resist moisture, stain, prohibit mold and mildew and reduce the loss of foam compression due to the elements.

## Rapid Deployment UV-C Disinfection Chamber COVID-19 “Virus Blaster”

**Key Features include:**

- 🔥 Hospital Grade UV-C Disinfection for Commercial Applications
- 🔥 Effective against viruses and other pathogens on exposed surfaces
- 🔥 Easy to Use and Safe with Integrated Timer for Dosage
- 🔥 Follows CDC Guidelines \* and FDA requirements\*\*
- 🔥 Approx. 20 Cubic Feet inside Disinfecting Chamber
- 🔥 Dual 55 watts UVC CFL lamps provide even exposure
- 🔥 Safety latch prevents UV-C light operation when door is opened.
- 🔥 Low power consumption, plugs into standard 110 outlet
- 🔥 Made in the USA
- 🔥 Top opening or side opening choice available.

At CellAntenna, we believe in innovation. In response to the COVID-19 outbreak, CellAntenna offers the industrial sized COVID-19 Virus Blaster UV-C Disinfection Chamber to provide a safe and effective solution for disinfecting parcels and equipment. As an adjunct part of your plan of action against COVID-19, the chamber uses UV-C radiation effective against the COVID-19 virus as well as other pathogens including H1N1, SARS, MERS, Ebola, other viruses and bacteria from the surface of objects placed in the chamber \*.

**Typical Operating Instructions :** *As we use it ourselves in our day to day operations : Place parcels, equipment, masks, tools in the chamber allowing some distancing apart. Close the door, lock and set timer. Then, flip the articles over, turn the timer again. No heat is generated. Articles can be used immediately. We use a dosage of 5 minutes each time.*

The COVID-19 Virus Blaster uses two germicidal UV-C lights and an integrated timer to deliver the proper dosage\*. Each chamber is quality tested and calibrated for UV-C light intensity. Test strips are provided with the chamber to verify the UV-C operation. The COVID-19 Virus Blaster is also equipped with a positive locking mechanism to ensure the operation of the UV-C only when the door is closed. An optional rotating platform can be used to provide even distribution of the UV-C.

\* Please refer to CDC references for Dosage requirements for various effective destruction percentages.  
 \*\* FDA Enforcement Policy for Sterilizers, Disinfectant Devices, and Air Purifiers During the Coronavirus Disease 2019 (COVID-19) Public Health Emergency Guidance for Industry and Food and Drug Administration Staff March 2020. **NOT TO BE USED BY HEALTHCARE INDUSTRY TO REMOVE COVID-19 SOURCED AT THE HOSPITALS.** As described, The VIRUS BLASTER CHAMBER is to be used as an ADJUNCT system as part of a plan of action developed by customer to control the spread of COVID-19 and other pathogens.

| SPECIFICATIONS  |   |
|-----------------|---|
| UV-C Intensity  | 500 $\mu\text{W}/\text{cm}^2$ (min) @ center with no ozone generation   |
| Wavelength      | 253.7 nm ( Primary Emission)  |
| Dosage *        | 450 mW-sec/ $\text{cm}^2$ @ 15 min 1W-sec/ $\text{cm}^2$ @33 min ( typ) |
| Emission Source | 2 x 55 watts Germicidal UVC CFL Lamps ( 8000 hrs )                      |
| Power Supply    | 110/220V AC 5A max with fuse  |
| Power Draw      | 250 watts   |
| Dimensions      | 34" x 34" x 38 "H ( wheels included)                                    |
| Weight          | 65 lbs  |
| Enclosure       | Weather resistant plywood unfinished interior, exterior painted         |
| Operating Temp. | 10°C to 40°C @ 80% humidity.  |
